Overview

2021 Updates and Changes

General Insurance Reminders

What Your Agent Needs to Know

2021 Updates and Changes

Prevent Plant Changes

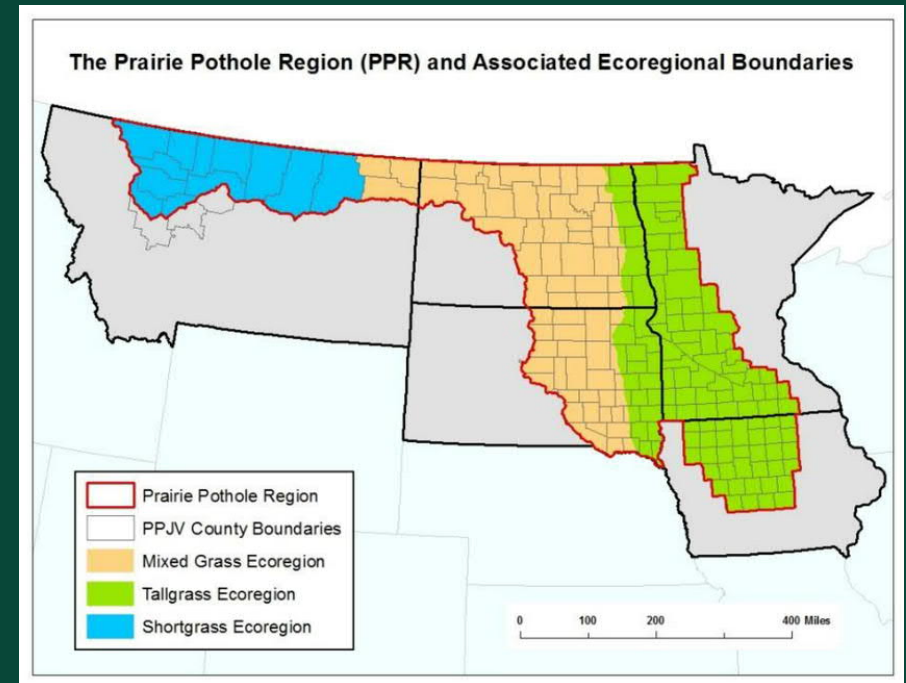

Expanded 1-in-4 planting rule

Now nationwide vs Prairie Pothole Region
Must be physically available for planting

Removed 2-crop history requirement within a unit

Must provide proof of intending to plant a 2nd crop

Revised to allow use of an intended acreage report for a 2nd crop year

Prevent Plant

Prevent Plant coverage is included in your crop insurance policy and pays on eligible *unplanted* acres.

- What are eligible PP acres?
- Difference between a “field” and a “unit”
- PP buy-up options available
- Added land? What are the PP coverage rules?
- Cover crop guidelines
- Enterprise unit discounts with PP acres
- PP vs fallow

Livestock Programs

Increased subsidies for 2021 crop year
(7/1/2020)

Fed Cattle, Feeder Cattle, & Swine

Coverage Level (Percent)	Previous Subsidy Rate (Percent)	Revised Subsidy Rate (Percent)
95-100	25	35
90-90	30	40
85-90	35	45
80-85	35	50
75-80	35	55
70-75	35	55

Proposed changes for 2021

Increased limits on feeder & fed cattle

- From 3,000 head/endorsement to 6,000
- From 6,000 head annually to 12,000

Increased limits on swine

- From 20,000 head/endorsement to 40,000
- From 75,000 head annually to 150,000

Livestock Programs

Proposed changes for 2021

Modified requirement to own livestock from last 30 days of endorsement to last 60 days

Added 39 and 52-week swine endorsements (13, 17, 21 & 26-week endorsements remain)

Created new feeder cattle and swine types to allow for unborn livestock to be insured

Master Yields

Master yield: production from all acres of the crop the producer has in the county is used to establish an approved APH yield

NEW

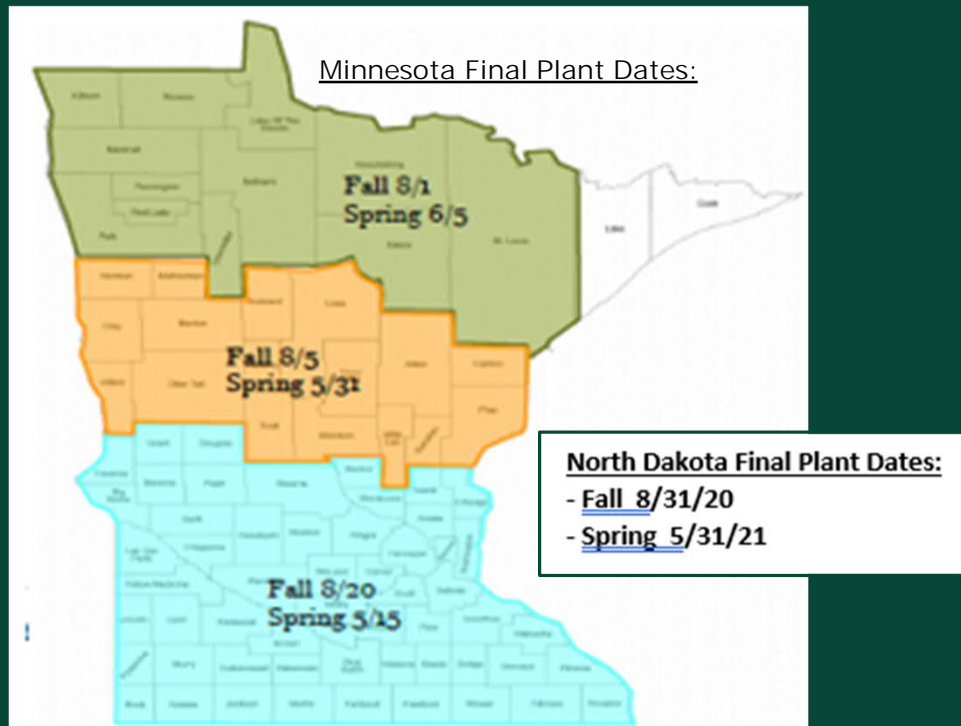

- Added Buckwheat as a Master Yield crop in ND
- Added Dry Beans as a Master Yield crop in MN

Additional Master Yield
crops in our association:

Dry Peas
Potatoes

Sugar Beets
Sunflowers

Forage Seeding & Production

- Summer/Fall seeded acres are now insurable without a Written Agreement.
- Seeding alfalfa (ND, MN) or red clover (MN) after July 1? Contact us by July 31 to discuss coverage options.
- If seeded after the final plant date, those acres are uninsurable on the Forage Seeding policy.
- Loss-adjustment procedures revised to use number of live alfalfa stems rather than number of live plants

Quality Loss Option (QLO)

NEW

Replaces post-quality production with pre-quality yields

- Elect by Sales Closing (3/15)
- NOL must have been filed for QLO to apply
- Will apply to previous quality adjustments
- Option to opt out by PRD
- Only one option, YE, YA or QL can be applied to an actual yield within a database

Enhanced Coverage Option (ECO)

NEW

Optional endorsement that provides *county-based coverage* for a portion of the deductible of the underlying MPCl policy

Covers from 86% up to 90% or 95% of approved yield

Similar to Supplemental Coverage Option (SCO) which covers from MPCl level up to 86%

Uses same expected and final area yields, projected and harvest prices, and payment factors as SCO

NEW

Enhanced Coverage Option (ECO)

Losses incurred on a county basis. Indemnities triggered when the county average revenue falls below 90% or 95% of the expected level, depending on the ECO trigger selected.

Losses are not affected by whether there is an indemnity payment on the underlying policy. It's possible to experience an individual loss, but not receive an ECO payment, or vice-versa.

Losses paid the summer following current crop year

ARC & PLC participation has no effect on eligibility for ECO

Available with SCO, but not eligible with MP, MP-HPO, ARPI, HIP-WI

Enhanced Coverage Option (ECO)

Deductible (no coverage)	100-95%
ECO Coverage Range	95% -86%
SCO or ARC Coverage Range	86-80%
MPCI Coverage Range	80%

Deductible (no coverage)	100-90%
ECO Coverage Range	90% -86%
SCO or ARC Coverage Range	86-80%
MPCI Coverage Range	80%

Enhanced Coverage Option (ECO)

Eligible Crops

Wheat
Millet
Flax
Popcorn
Grain Sorghum
Silage Sorghum
Peanuts
Soybeans
Tobacco

Canola
Rice
Sugar Beets
Dry Beans
Cultivated Wild Rice
Hybrid Corn Seed
Sunflowers
Barley
Sesame

Oats
Cotton
Corn
Hybrid Sorghum Seed
Safflower
Dry Peas
Hybrid Seed Rice
Buckwheat

Hemp

2021

Available in MN, ND & WI
for APH coverage in many
counties

Check with your insurance
specialist for details

Crop Insurance Reminders

Crop Insurance Reminders

Review production for claims

Need to report production claims within 15 days of harvest

Revenue claims must be filed within 45 days of harvest price announcement

The AIP has the right to deny claims after 60 days from the end of insurance period or completion of harvest

Production reports

The sooner you get them in, the more accurate your quotes

2021 Strategies to Consider

Get the correct MPCl coverage & options in place

- Coverage levels/unit structures
- Added land or new crops

Look at a hail plan and/or supplemental coverage

- Production, Companion, Deductible, Basic
- Endorsements (Wind, WFC, etc.)
- Add additional coverage on top of the MPCl w/ supplemental coverage

Bundle your MPCl, hail & supplemental coverage

- Be assured your coverage works together

What Your Agent Needs to Know

What Your Agent Needs to Know

Some things you'll want to discuss with your specialist:

- Change in entity structure
i.e. operator transitions, SBI changes, tax ID, etc.
- Change in name, address, phone, marital status
- Change in shares
- Planting intentions or prevent plant concerns
- Added land or entities
- Marketing plans
- Cost of production
- Transition plans
- New crops and/or practices
- Questions regarding unit structures, plans of coverage, 2021 policy changes
- Adding a Power of Attorney or Authorized Rep
- Any additional plans or concerns
